LIST OF FIGURES.	x
LIST OF TABLES	xiii

PART I INTRODUCTION

CHAPTER 1

THE PROBLEM IN CONTEXT	2
1.1 Introduction	2
1.2 Soil Erosion Processes	4
1.2.1 Introduction	4
1.2.2 Rainfall	6
1.2.3 Soil Type	10
1.2.4 Topography	11
1.2.5 Land Use	12
1.3 Soil Erosion and Rainfall Intensity	13
1.4 Rainfall Intensity and Climate Change	16
1.5 Soil Erosion Prediction Models	19
1.5.1 Introduction	19
1.5.2 Universal Soil Loss Equation (USLE)	25
1.5.3 Water Erosion Prediction Project (WEPP)	27
1.5.4 European Soil Erosion Model (EUROSEM)	32
1.5.5 RillGrow	38

CHAPTER 2

RESEARCH BACKGROUND AND OBJECTIVES	43
2.1 Background and Direction	43
2.2 Objectives and Rationales	45
2.3 Some Questions To Be Answered	50

2.4	Expected Outcomes	51
-----	-----------------------------	----

CHAPTER 3

DESCRIPTIONS OF DATA, MODELS AND METHODS		52
3.1	Data	52
3.1.1	Rainfall Data	52
3.1.2	Other Data	56
3.2	Justification for Erosion Model Selection	59
3.3	A Brief Overview of Research Method	61
3.3.1	Statistical Methods for Trend Investigation	63
3.4	Observed Rainfall Characteristics Of The Study Area	64
3.4.1	Introduction	64
3.4.2	Method	66
3.4.3	Monthly Precipitation	69
3.4.4	Daily Precipitation	72
3.4.5	Event Precipitation	75
3.4.6	Discussion	85
3.4.7	Conclusion	89

PART II RAINFALL INTENSITY AND EROSION: MODEL DESCRIPTIONS AND RESPONSES

CHAPTER 4

IMPLICATION OF IMPROVED CLIGEN		92
4.1	Introduction	92
4.2	Data Preparation and Method for Model Simulation	93
4.3	Impact on Rainfall Data Generation	94
4.3.1	Rainfall Amount	94
4.3.2	Rainfall Duration	95
4.3.3	Monthly Maxima of Daily Peak Rainfall Intensity	96
4.4	Impact on Runoff and Soil Loss Estimation by WEPP	99
4.5	Discussion	104
4.5.1	Impact on Rainfall Data Generation	104
4.5.2	Impact on Runoff and Soil Loss Estimation	105
4.6	Conclusion	106

CHAPTER 5

EFFECT OF TEMPORAL SCALES OF STORM DATA ON EROSION		108
5.1	Introduction	108
5.2	Simulation Data and Methods	109
5.3	Effects on Rainfall Intensity Information	111

5.4	Effects on Simulated Runoff and Soil Loss	113
5.4.1	Runoff	113
5.4.2	Soil Loss	117
5.5	Discussion	121
5.6	Conclusion	126

CHAPTER 6

EFFECT OF CONTINUOUS AND DISCONTINUOUS STORM		129
6.1	Introduction	129
6.2	Simulation Data and Methods	129
6.3	Simulation Results	130
6.4	Discussion	133
6.5	Conclusion	135

CHAPTER 7

EFFECT OF WITHIN-STORM RAINFALL INTENSITY CHANGES ON SOIL EROSION		136
7.1	Introduction	136
7.2	Simulation Data and Methods	136
7.3	Effects on Runoff and Soil Loss	137
7.4	Discussion	139
7.5	Conclusion	141
7.6	Summary of Model Simulation Results	141
7.7	Limitations of Erosion Models	143

CHAPTER 8

FURTHER STUDY ON TEMPORAL INTENSITY VARIATION		146
8.1	Aim	146
8.2	Method	146
8.3	Result	148
8.3.1	WEPP simulation	152
8.3.2	EUROSEM simulation	152
8.4	Discussion	152
8.5	Additional tests	157
8.5.1	Aims	158

PART III IMPLICATIONS FOR MODEL-BASED STUDIES OF FUTURE CLIMATE CHANGE AND SOIL EROSION

CHAPTER 9

ESTIMATION OF SOIL EROSION: IMPLICATIONS FOR FUTURE RAINFALL INTENSITY	161
9.1 Introduction	161
9.2 Proposed Simulation Methods	163
9.2.1 Method One: Changing CLIGEN Generated Data	163
9.2.2 Method Two: Changing One of CLIGEN Inputs, MX .5P	164
9.2.3 Method Three: Using GCM/RCM Data	167
9.2.4 Selected Method: Method Two, Changing CLIGEN Input . . .	169
9.3 Sensitivity of WEPP to Rainfall Intensity Changes	169
9.3.1 Runoff and Soil Loss	171
9.3.2 Discussion	171
9.4 Estimation of Future Soil Erosion	173
9.4.1 Estimated Future Rainfall for WEPP Simulations	174
9.4.2 Estimated Changes of Future Soil Erosion	177
9.4.3 Discussion	178
9.5 Conclusion	181

PART IV CONCLUSION

CHAPTER 10	
CONCLUSION	184
10.1 Rainfall Intensity and Process Descriptions	185
10.1.1 Findings	185
10.1.2 Limitations	186
10.2 What do we need to predict erosion under future changed rainfall intensities?	187
10.2.1 Findings	187
10.2.2 Limitations	189
10.3 Past and Present Rates of Rainfall Intensity	189
10.3.1 Findings	189
10.3.2 Limitations	190
10.4 Can we predict erosion rates under future changed rainfall intensities? .	190
10.4.1 Findings	190
10.4.2 Limitations	190
10.5 Suggestions for Future Research	191
REFERENCES	192

APPENDICES

A. WEPP INPUT DATA	205
A.1 Weather Input Data	205
A.1.1 For Temporal Scale Simulation	205
A.1.2 For Storm Patterns Simulation	210
A.1.3 For Continuous and Discontinuous Rainfall Simulation	213
A.2 Soil Input—calibrated	215
A.3 Management Input	215
A.4 slope Input	218
 B. CLIGEN INPUT DATA	 221
B.1 Original Input for Ditchling Road	221
B.2 Updated Input for Ditchling Road	222
 C. EUROSEM INPUT DATA	 224
C.1 SYSTEMS	224
C.2 OPTIONS	224
C.3 COMPUTATION ORDER	225
C.4 ELEMENT WISE INFO	225
